From : Matt Kertz

Subject : Thank You

Ivey Mechanical completed some items for Ash Grove Texas, L.P. at our Denton Terminal location in Denton, Texas. These projects included installing a platform to access the top of rail cars, installing piping to convey cement to the top of a silo, installing concrete to increase the width of our driveway and installing some guarding. We could count on Ivey to perform quality work and to have the work completed on time and within budget. They have been great to work with on these projects.
