RE: Letter of Reference Ivey Mechanical

To Whom It May Concern:

I would like to take the time and recognize Ivey Mechanical for performances on past and present Healthcare projects.

I myself have been working with Ivey for several years across the Southeast and Midwest portions of the country. Each and every job, they have exceeded all expectations, and their performance has been unmatched. From the office aspect with submittals, contracts, change orders, etc.. to the field side of management, keeping up with the schedule, quality of work, safety, etc... they have always been at the top, when it comes to a mechanical contractor.

At the present time, we are working together on the Southeastern Oklahoma Medical Center in Durant, Oklahoma. This has been a challenging project with the phasing of the renovation areas, and the expansion of the 20 Bed Medical Surgical area. The schedule in itself has been challenging enough, and Ivey has been the trend setter for all the other subcontractors to keep up.

With this project coming to a close, I look forward too working again with Ivey in the near future, and would recommend them as a first class organization.

Please feel free to contact myself with any questions.

Respectfully,

Bobby Fisher
Sr. Project Manager
